NDIGITEC Opens A New Chapter In Its History

***The State-of-the-art
Headquarters Is
Ready To Welcome
Employees, Partners,
And Clients***

NDigitec has opened the doors of its first large-scale headquarters and factory in Dubai Production City, as part of a two-stage construction project, following the rapid expansion of the company in the UAE.

The ceremony took place on February 22. The president of Nesma Holding, Faisal Saleh Alturki, and Managing Director of Media Clusters of TECOM, Majed Al Suwaidi, inaugurated the facility. With their help, the new headquarters is now ready to welcome its employees, partners, and clients.

During the opening ceremony, the co-founder & CEO of NDigitec, Vatche Kavlakian, presented the new facility to the guests and shared the company's vision for the upcoming years. After the tour, he granted special awards to those who have been crucial to in the decades-long success of the company.

The opening of the state-of-the-art facility has marked an important milestone in the company's history. As part of its expansion, NDigitec will not only embark on new projects but also create dozens of new jobs within the next

three years.

He said, "We have achieved incredible growth since we established our presence in Dubai Production City, and our headcount has increased from five to more than 100 people during this time".

He continued, "This non-stop growth gave us the confidence to launch our expansion strategy and build the region's largest single-site pre-press factory and digital printing facility to accommodate our growing team, increase our market share, and prepare us for the future as we embrace

NDigitec's New Headquarters Includes More Than 50,000 sq.ft Of Built-up Area

artificial intelligence, augmented reality, machine learning, and big data analytics."

In 2016, NDigitec acquired a 110,000 sq.ft. plot of industrial land to build its new facility. The intention was to bring all five of its divisions / competencies – Prepress, Premedia, Digiprint, Fabrication, and Dubaiprint.com – under one roof.

NDigitec's new headquarters includes more than 50,000 sq.ft of built-up area, comprising office spaces, a mezzanine, and a production area equipped with the latest industry's technology.

The second phase of its expansion will see the addition of 30,000 sq.ft of a built-up area that will provide additional services and capabilities for further vertical and horizontal expansions.

Majed Al Suwaidi, Managing Director of Dubai Production City, added: *"Dubai is an international business hub that has attracted thousands of media professionals from around the world to the UAE, and the expansion of our business partner NDigitec highlights the private sector's*

Expansion Will Create Dozens Of New Jobs Within The Next Three Years As The Business Eyes Automation, Artificial Intelligence Investment.

confidence in Dubai's ever-changing media landscape."

Acknowledging the innovative potential of NDigitec, he continued, "The cutting-edge printing complex built in Dubai Production City is an exciting addition to our business community of more than 255 companies & 6,000 people."

The new headquarters will allow NDigitec to tackle new, even more ambitious projects, creating more opportunities, and elevating the quality of production in Dubai. Staying true to its core mission — 'A promise is a promise' — the company will continue providing superior quality services, revolving around its customers' needs.

Dubai Production City And NDIGITEC Continue Their Partnership

Expanding on the territory of the Dubai Production City (DPC), the leading media production hub has a special significance to NDigitec.

The company joined DPC in 2005, and the business-friendly environment has positively reflected on the company's operations. As stated by Vatche Kavlakian, the business hub has allowed NDigitec to grow faster than ever and expand its brand.

Dubai Production City is the media production area in the region, home to over 255 companies and 6,000 employees. It has the best facilities and infrastructure for local and international companies that provide diverse media solutions.

The structure of the business hub facilitates growth and development, ensuring the long-term success of the companies.

NDigitec, being one of the top innovative media & printing production companies that provide cutting-edge prepress, premedia, printing & fabrication solutions, with its expansion, will enrich the area, taking its success to another level.

Development of NDIGITEC's Saudi Arabia Branch

Starting from 2009, NDigitec has been operating in Saudi Arabia. The company has had a chance to bring value to its clients in the area, establishing partnerships with numerous companies and influencers.

NDigitec's new target is to expand the spectrum of connections and draw more attention to Saudi Arabia. Leszek Krawczyk, the new Premedia executive producer at NDigitec, shared, "Our focus is on interactive exhibitions and museums in Saudi Arabia. These large-scale projects will attract global attention and help boost tourism. It is an unprecedented opportunity to contribute to the ambitious plans of national transformation and re-discovery of Saudi Arabia's diverse cultural heritage."

The Expansion Will Take NDIGITEC's Competencies To Another Level

NDigitec has always been responsive to the needs of its customers. Invested in perfecting its operations and technologies, uniting the core services in one place has been the logical next step for the company. By working in the same area, the company now can cut time on production, improve communication between departments, and function in sync with every project requirement.

Ever since acquiring the land, NDigitec has been looking forward to moving to a new workspace and the changes it would bring. Uniting all the competencies will allow the company to introduce a chain of new and valuable solutions to meet the diverse needs of its customers.

Prepress

Prepress is one of the core competencies of NDigitec. With the expansion, the company wants to take its performance to the next level. Top-notch technologies, combined with improved operations and an unmatched level of expertise, will allow the company to deliver an unseen quality of Digital Flexo Plates and exceptional packaging solutions.

Shahe Kavlakian, the Executive Manager of Prepress, added, "As part of the improvement, NDigitec, will continue investing in its one-of-a-kind automation and integration system – NDXC – and continue being a pioneer in the field of Prepress technologies in the region."

Premedia

The expansion has signified important changes in the operations of Premedia competency. With the opening of the new headquarters, the company also welcomed on board Leszek Krawczyk, the new Premedia executive producer. Together with NDigitec, he will embark on new ventures and build upon the many years of expertise to inspire change.

Within the spectrum of the services, NDigitec also plans to embrace cutting-edge solutions such as AI, AR, machine learning, and big data analytics.

Digiprint

The unification of all headquarters will allow the company to build upon the exceptional quality of its digital printing services. With its new top-quality equipment and innovative operational methods,

NDigitec will offer outstanding solutions even quicker.

The company will continue delivering superior quality portable displays, large format prints, and other latest digital press solutions to its customers all over the region.

Fabrication

Larger, more ambitious, and even more innovative Fabrication projects are on the agenda of NDigitec. With the new facility, the company will continue catering to the needs of its customers, creating even more high-tech and tasteful exhibition and event stands.

From 3D modeling to installation, NDigitec is ready to help its customers communicate the right message.

Dubaiprint.com

Being the first and pioneering digital printing platform in the region, Dubaiprint.com will continue providing outstanding quality printing services and products from the new headquarters.

With the expansion and relocations, Dubaiprint.com will introduce more products, meeting the interests of both B2B and B2C sectors.

Accelerating Flexographic Plates Production with NDXC

Recently, NDigitec has announced the launch of a new printing era, moving from HD quality flexo printing to the XPS Crystal. Right now, NDigitec is the only company that offers XPS Crystal digital flexo plates in the region.

The NDIGITEC XPS CRYSTAL or **NDXC** is an unprecedented custom-built automation platform developed by NDigitec.

It is a platform that takes flexo plate production to another level.

The **NDXC** allows creating perfectly balanced printings with smooth fading, higher contrasts, and exceptional color consistency.

The innovative platform lets NDigitec integrate all its high-end solutions & provide customers with exclusive flexo plate quality, nowhere to be found on the market.

NDXC is more efficient in terms of quality, speed, and other resources.

The NDigitec's software allows the company to complete the orders faster, without having to sacrifice the quality of prints. The models allow to pay more attention to detail and avoid costly flexo printing production mistakes.

The new facility and headquarters will only add to the overall development of our **NDXC** platforms. With operational changes, the company will improve its productivity, achieving superior results in less time.

Sijo Devassykutty Production

I've been working at NDigitec for 7 years now. During those years, I've handled not only electrical and maintenance works but also all productions.

One of the biggest tasks, entrusted to me by the management, was overseeing the construction of NDigitec's new facility. I'm grateful for the trust and support of my seniors.

Now, I'm ready to face bigger challenges that will come my way. NDigitec is my second home. Working here has allowed me to become the best version of myself.

NDIGITEC Embraces Innovative Solutions Of The Future

Nothing says 21st century the way 3D printing, Artificial Intelligence, Virtual Reality, machine learning, and big data analytics do. Advances in these fields are becoming increasingly more important.

Understanding their potential, as the company that holds innovativeness as its core value, NDigitec has made an effort to follow and dictate trends. With the new office, the company will

keep on experimenting with new technologies and solutions.

NDigitec has ambitious plans connected to advanced technology development and will continue investing in promising fields. The company plans to use the innovative solutions in its operations and embed them into all its competencies, as well as offer the services to its lifelong customers.
